## Balaji Railroad Systems Limited

Sunil Srivastava  
Managing Director

### Please Provide a brief Background of the Company and its Operations?

BARSYL was established 34 years ago, with the objective of offering specialised engineering and consulting services in rail domain. The founders of BARSYL were all eminent professionals from Indian Railways having multi-disciplinary expertise. BARSYL offers a range of integrated solutions that are custom designed to suit client specifications. Our gamut of services ranges from systems planning, design, project management and advisory services successfully implemented for over 900 projects across 15 countries.

Over these years BARSYL has evolved into an organization whose integration of knowledge and experience, is trusted in domestic and international markets. Built on

**“**Our success mantra has always been **INNOVATION** in service offerings. We have never shied away from taking on challenging assignments and delivered them successfully.**”**

solid professional principles, BARSYL takes pride in its meticulous work ethic, attention to detail and clear understanding of client needs. All of which have made it an award-winning player in the consulting domain. And a preferred partner wherever the emphasis is on quality of delivery and timely execution. The professional calibre of BARSYL has won recognition consistently over the years. BARSYL is perhaps the most awarded SME also a major foreign exchange earner in the Consulting sector.

BARSYL has been associated with some of the pioneering projects in the rail sector viz; Hyderabad Metro (Worlds largest PPP transit project), Pamban Rail Bridge (Worlds only Vertical lift bridge), Railway Master Plan for Sabah (first railway network in the region) to name a few.

### What has been the Success Mantra of your Organisation?

Our success mantra has always been **INNOVATION** in service offerings. We have never shied away from taking on challenging assignments and delivered them successfully by making use of the innovative spirit of our team, technology and our quest for knowledge. We were one of the first Indian consulting firms in rail

domain to offer services to clients in developed nations like UK and Singapore.

### What kind of Support do you expect from the Government to help sustain the Eco System in which you Operate?

Under the Atmanirbhar Bharat scheme the government has not looked at consulting services as a major contributor. Whereas like the IT industry, consulting services especially railway consulting has the potential to become a global industry and major Foreign exchange earner for India. A large number of railway professional from India are working in all countries having a railway network. Most Indian companies have the skill sets but what they lack is the size. So this is where the Government can support us. Govt plans to spend about ₹ 1.00 lakh Crores on infrastructure in the next 5 years. So if the Govt can mandate a minimum compulsory participation of Indian Owned companies in consulting services for all infrastructure projects in India, the Indian companies will be able to grow and bid for global assignments independently.
